All the stock is of the finest quality.

PEACHES.

The trees are straight, smooth, bright, beautiful—finer trees were never grown. Owing to the fact they were grown adjacent to a large body of salt water (which raised the temperature several degrees) they were not injured in the least by cold the past winter; although Peach Trees in this and adjoining states of the same latitude were in many cases badly damaged by freezing.

ROSENA, Va., April 10, 1904. Dear Sir: The peach trees to hand. I was very much pleased with them; found them all as you said they would be, smooth and straight, and everybody who saw them pronounced them very nice trees. Respectfully yours, MISS M. E. CRICKENBAYER.
